textile & cushions

Lectus Furniture uses the finest weather-resistant textile to create elegant yet comfortable cushions and pillows.

The Sunbrella® Elements collection offers over 200 different fabric options, and a wide range of solids, textures, stripes and jacquards styles, allowing you to personalize and customize each and every piece (Lectus Furniture welcomes customers' own material).

The foam cores are made of high-quality density foam, surrounded by a water-resistant polyester batting wrap, enhancing the aesthetic and comfort of all cushions.

About Sunbrella® fabric - specially formulated solution-dyed acrylic fabrics that provide a vastly more durable performance. Solution-dyed fibers and UV stability ensure colorfastness.

Protective coatings resist water, stains, mold, and mildew. Unique fabric blends create soft, breathable fabrics. Quality materials and weaving techniques mean the fabric keeps its shape. Engineered for the outdoors, Sunbrella fabrics are durable and long lasting.

manufacturing

The care and dedication of our Master Artisans and Weavers is what set Lectus Furniture apart.

Their passion is reflected in every piece and the meticulous inspections throughout the production cycle guarantee a product that will satisfy the most discerning client.

Our furniture pieces embody today's technology with centuries-old craftsmanship.

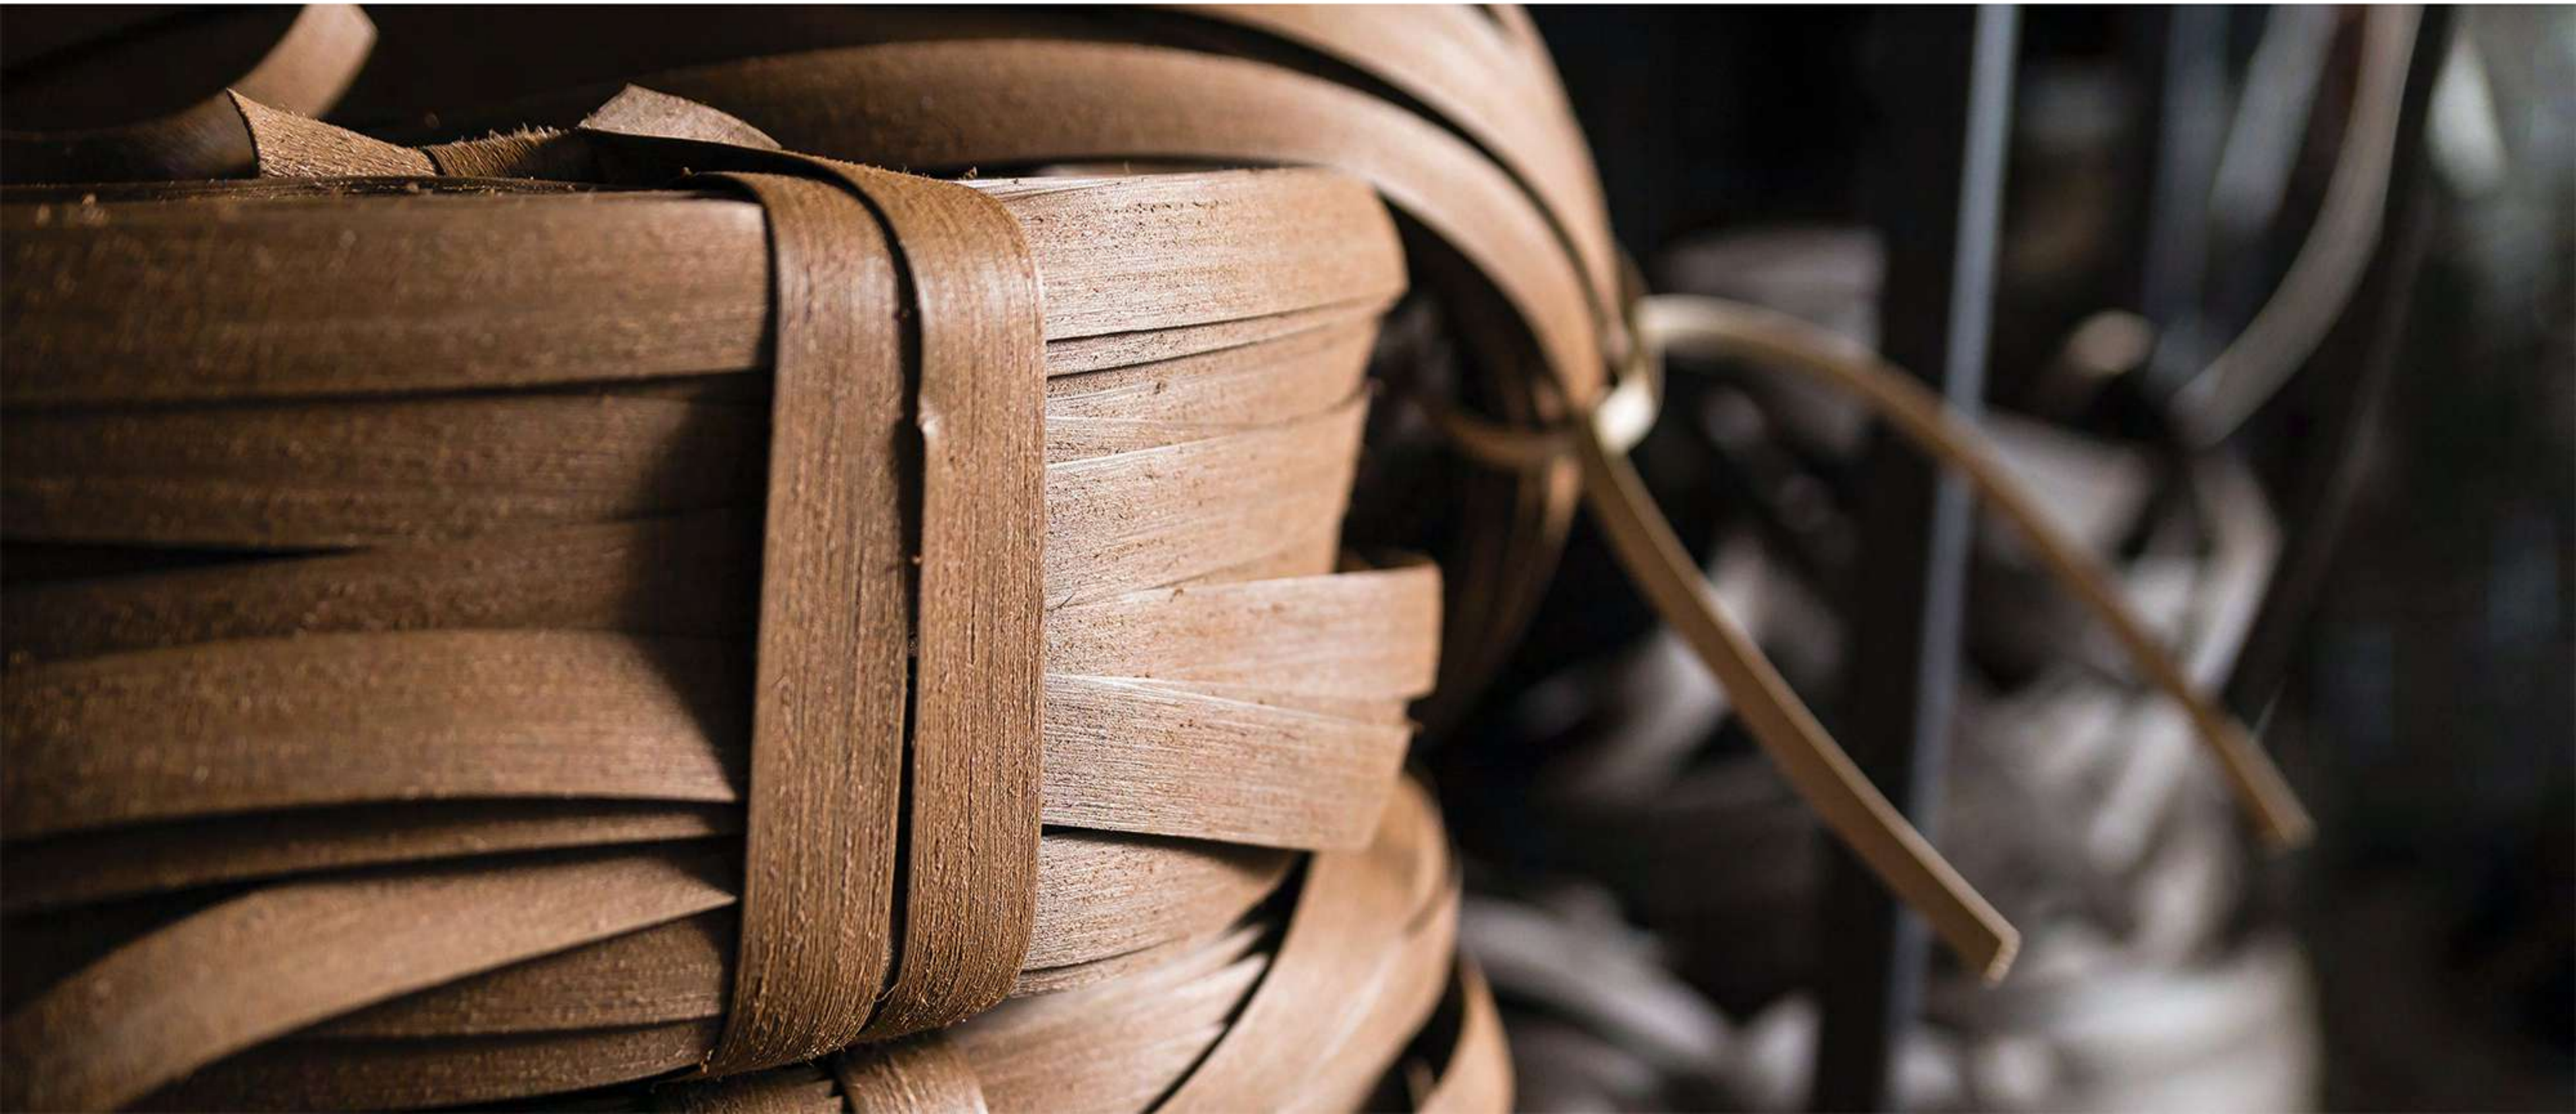

F I B E R

Our luxurious synthetic fibers are manufactured following international standards in order to guarantee patterns and uniformity in color. Our products are manufactured with 100% virgin raw materials of high quality that guarantee great strength and durability.

During its manufacture, the fiber is stabilized with ultraviolet absorbers in the ideal concentration, antacids to protect against chlorine attack, and colored with inorganic pigments with high solidity light and high resistance to migration, the same used by the automobile industry in automotive paint.

In summary, our fibers are ecologically friendly and 100% recyclable, highly resistant to pool and seawater, cold and heat (recommended surface temperatures between -20°C or -4°F to 55°C or 130°F), ultraviolet radiation (UV), and mold and mildew. Easy to care and maintain, and recommended for indoor and outdoor use.
